

## Week 7: AI Feature Demo

### 1. User input screen (AI Prep feature)

[Placeholder for Dashboard UI Screenshot]

(User sees their application dashboard and clicks the "Sparkles" button to request AI interview preparation for a specific role and company.)

## Week 7: AI Feature Demo

### 2. Loading state (mid-request)

[Placeholder for Loading State Screenshot]

(The AI modal opens and displays a loading spinner with the text "Generating personalized interview questions...". The UI is blocked until the Gemini API responds.)

## Week 7: AI Feature Demo

### 3. Final AI output displayed (with Network tab)

[Placeholder for Final AI Output Screenshot]

(The AI modal updates to show exactly 3 likely interview questions and 1 actionable Pro Tip. The browser DevTools Network tab is open, showing a successful POST request to `/api/ai/prep` with a 200 OK status.)
